

Samsung's IF Series displays are the comprehensive solution for an improved LED experience. By streamlining installation, presentation and management, businesses can create and share powerful content with minimal hassle.

Samsung IF020 [Indoor Model IF020H]

Screen Specification

Specifications		IF020H
DISPLAY REQUIREMENTS	Screen Configuration (WxH)	8 x 4
	No. of Cabinets	32
	No. of Spare Cabinets	2
	Total No. of Cabinets	34
DISPLAY WALL DIMENSIONS	Dimensions	3.84 X 2.16 m
	Display Area	8.29 m ²
	Diagonal	173.62 inch
	Weight	185.6 kg
OPTICAL PARAMETER	Resolution	1920 X 1080
	Minimum No. of S-Boxes	1
POWER REQUIREMENTS	Max	5760 Watts
	Typical	1920 Watts

* Specifications are subject to change without notice.

Product Specification

Model Name **IF020H**

Physical Parameter	Pixel Pitch	2mm
	Diode Type	Surface Mount Device (SMD)
	Dimensions (mm, LxHxD, per cabinet)	480x540x65 mm (per cabinet)
	Dimensions (inch, inchxD, per cabinet)	28.5 inch x 2.56 inch
	Weight (per cabinet))	5.8kg (per cabinet)
Optical Parameter	Brightness (Peak/Max)	2,400 nit / 1,200 nit
	Contrast Ratio (Peak/Max)	10,000:1 / 5,000:1
	Viewing angle - Horizontal	160° (140° (2))
	Viewing angle - Vertical	160° (140° (2))
	Bit Depth	16bit per Color
	Color temperature - Adjustable	2,800 ~ 10,000K (use S/BOX)
Electrical Parameter	Video Rate	50/60 Hz
	Input Power Range	100~240 VAC, 50/60 Hz
	Power consumption - Max	695 (W/m2) / 180 (W/Cabinet)
	Power consumption - Typ	232 (W/m ²) / 60 (W/Cabinet)
	Heat generation - Max(BTU/SF)	220 BTU/SF per hour
	Refresh rate	1,920Hz, 3,840 Hz Selectable
Operation Conditions	Working Temperature / Humidity	0°C~40°C / 10~80%RH
	Storage Temperature / Humidity	-20°C~45°C / 5~95%RH
	IP Rating	IP20
	LED Lifetime	100,000 hours
Certification	Certification	EMC Class A, Safety 60950-1
Service	Service	Front and Rear
Package	Box Dimension (mm, LxHxD)	606 x 667 x 179
	Box Volume (m2)	0.073
	Package Weight (kg, per cabinet)	9.1kg (per cabinet)

Game-Changing Indoor Business Ideas, Brought to Life

As businesses seek new strategies to enliven the indoor customer experience, high-resolution LED content continues to emerge as a go-to upgrade. Samsung's IF Series displays are the comprehensive solution for an improved LED experience. By streamlining installation, presentation and management, businesses can create and share powerful content with minimal hassle.

Production Information

PIONEERING HDR-POWERED VISUAL INNOVATION

Samsung's IF Series bring market-leading video processing tools together with High Dynamic Range (HDR) picture refinement technology to maximize brightness and fine-tune overall picture presentation. This unique combination fosters a cutting-edge, next-generation viewing arena in any environment.

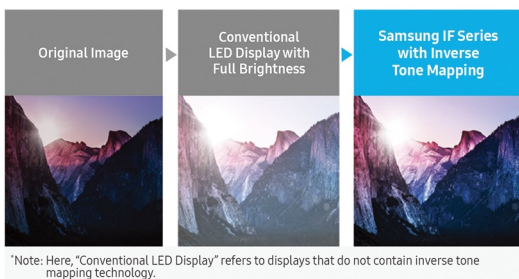

Optimize Content Brilliance

To ensure optimal LED performance, the IF Series employs dynamic peaking technology that combats potential interference from natural or ambient lighting. Dynamic peaking produces featured content at peak brightness levels nearly twice as high as the standard LED signage maximum. As a result, the IF Series displays produce brilliant, consistent content that shines even against white or dark backgrounds.

Showcase True-to-Life Imagery

As certain LED displays struggle to reflect wider RGB color gamuts, the ensuing oversaturation can give skin tones an unnatural reddish hue. Samsung's IF Series displays mitigate these variations and maintain consistent gradation through in-depth color management. As a result, featured subjects ranging from models and newscasters to virtual conference participants appear with lifelike realism.

Elevate Contrast and Brightness

Samsung's IF Series displays ensure ongoing uniformity and create a comfortable long-term viewing environment by leveraging strict Scene Adaptive HDR technology. This includes specialized inverse tone mapping algorithms that analyze and optimize gradation and brightness levels within individual content scenes while simultaneously eliminating shine.

Production Information

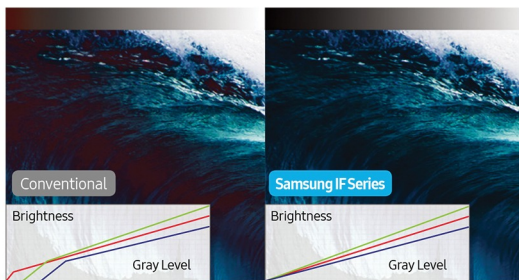

EXCEPTIONAL, INDOOR-READY PICTURE QUALITY

With Samsung's IF Series displays, businesses can customize color presentation to fit their unique branding needs while also avoiding common LED display visual inconsistencies. The displays leverage real-time tuning to ensure color consistency and elevated clarity, and deter audience distraction.

Customize Color Presentation

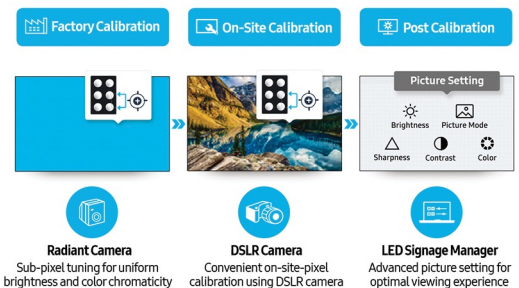

Detailed color management functionalities also allow IF Series users to select, store and deploy the RGB color gamut shades that best fit their unique branding and content needs. This convenience benefits museums, corporate facilities, news studios and other environments who must quickly deploy content at high clarity across multiple screens.

*Note: Here, "Conventional LED Display" refers to displays that do not contain integrated low grayscale correction technology.

Reinforce Accurate Low Grayscale Color Expression

A unique grayscale management algorithm empowers the IF Series displays to deliver consistent red, green and blue hues without distortion, even in low grayscale settings. This color stability ensures optimal and uninterrupted picture quality in museums, galleries and other low-brightness indoor environments.

Fine-Tune Uniformity

Rigorous factory calibration fine-tunes all IF Series sub-pixels for uniform brightness and color chromaticity out of the box. For added consistency, the IF Series displays also leverage DSLR cameras - rather than radiant - for real-time sub-pixel calibration. When coupled with the integrated Samsung LED Signage Manager's advanced picture settings, this enhanced display treatment produces an excellent presentation.

*Note: Here, "Conventional LED Display" refers to displays that do not apply external mask.

"Mask" Visual Inconsistencies

IF-D Series displays apply an external black mask sheet* to offset the lead framework exposure and glittering effect that often affects higher pixel-pitch LED offerings. For added consistency, each sheet adheres to the display via glue, in place of screws that pose an additional glittering risk. By closing visual gaps, these masks ensure that the IF-D Series can uphold contrast against dynamic lighting exposure.

*Note: The black mask module is only applicable for the IF040H-D and IF060H-D models.

Production Information

SEAMLESS PREMIUM DISPLAY INSTALLATION

The IF Series' advanced design accommodates and ensures a clean, gap-free installation in any business environment. A compact size and compatible, hook-based Direct Mount™ Kit reduce setup time and allow users to quickly align and activate their displays.

Enjoy a Clean, Hassle-Free Installation

The IF Series' design produces a uniform installation across any setting or wall height by overcoming gaps between frames or cabinets. A specialized Direct Mount™ Kit offers users hooks to connect each individual screen. Users in turn can slide and mount each screen to the frame in a simple motion, rather than requiring more laborious nail- or screw-driven processes.

Ensure a Compact and Compliant Activation

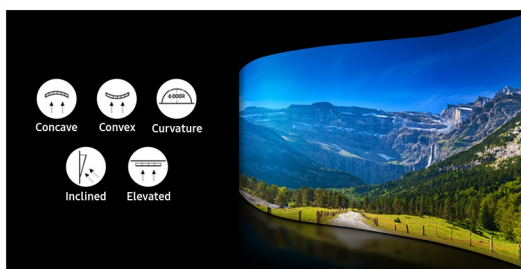

Regardless of the environment, the IF Series' sleek design ensures seamless adherence without requiring an extra wall or backdrop installation. Together, the frame and screen account for 90 mm* of space, ensuring compliance with Americans with Disabilities Act (ADA) protrusion regulations.

*Note: Depth of IF012J equals 99.4mm

Ease Maintenance through Full Front and Rear Access

For added flexibility, the IF Series displays offer full-front access to critical signage components. This expanded visibility further drives clean installations free of catwalk space and ensures closer adherence to neighboring surfaces. Similarly, the IF Series displays foster more convenient, quick-turn maintenance by making rear display components fully accessible without removal or disassembly.

Expand Display Composition Possibilities

Businesses seeking an extra competitive edge can strategically position Samsung's IF Series displays in their most advantageous locations. The IF Series' advanced design includes both convex* and concave curved configurations (up to 6,000R in curvature) guaranteed to catch audience eyes. Additionally, businesses can align their IF Series displays on an incline or adhere them to a ceiling**, opening new engagement possibilities regardless of environmental constraints.

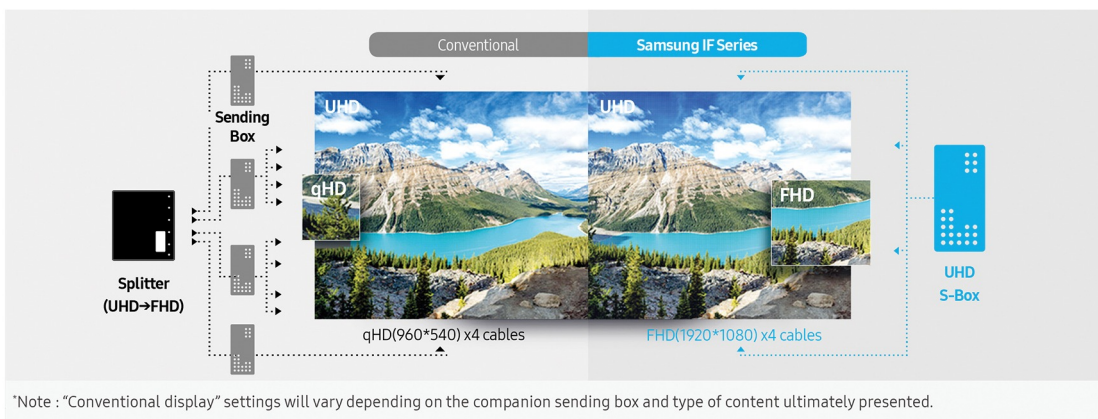

*Note: Convex designs are only available for the IF025H-D, IF040H-D and IF060H-D models.

**Note: Inclined or ceiling installations are only possible with the IF040H-D and IF060H-D models.

Production Information

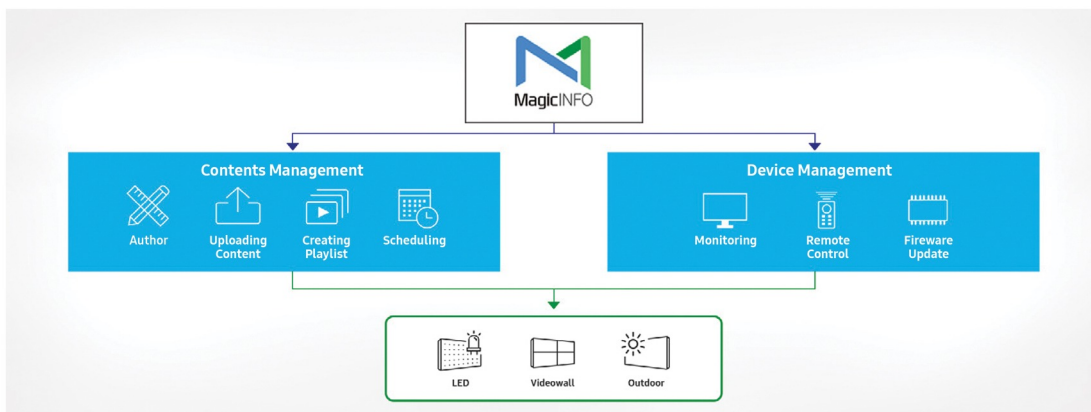

NEXT-LEVEL OPERATIONAL EFFICIENCY

Backed by Samsung’s powerful LED Signage Box (S-Box), the IF Series displays allow users to streamline the presentation and management of brilliant, true-to-life content. The S-Box’s extensive visibility empowers faster review and troubleshooting of potential challenges without disrupting performance.

Streamline UHD Content Delivery

Samsung’s compatible S-Box condenses the delivery of compelling content to a single, centralized device. The S-Box transmits UHD content across multiple IF Series displays without requiring external boxes or splitters, helping businesses enjoy faster and more cost-efficient operations.

Centralize Content and Device Management

By aligning Samsung’s MagicInfo content management platform with the LED S-Box, IF Series users can remotely program and modify their entire display network’s settings within a single source. MagicInfo users can create, schedule and deploy content across multiple displays directly from their personal devices. The platform’s extensive visibility also empowers users to monitor and adjust display settings and troubleshoot potential performance issues from any location via remote access. This includes the ability to implement firmware updates to maximize performance and LED HDR picture settings for the best possible visibility.
